

Access to Safety

The most comprehensive community safety navigation tool on the planet.

Part of the Access To project family – open-source Claude skills for human rights infrastructure.

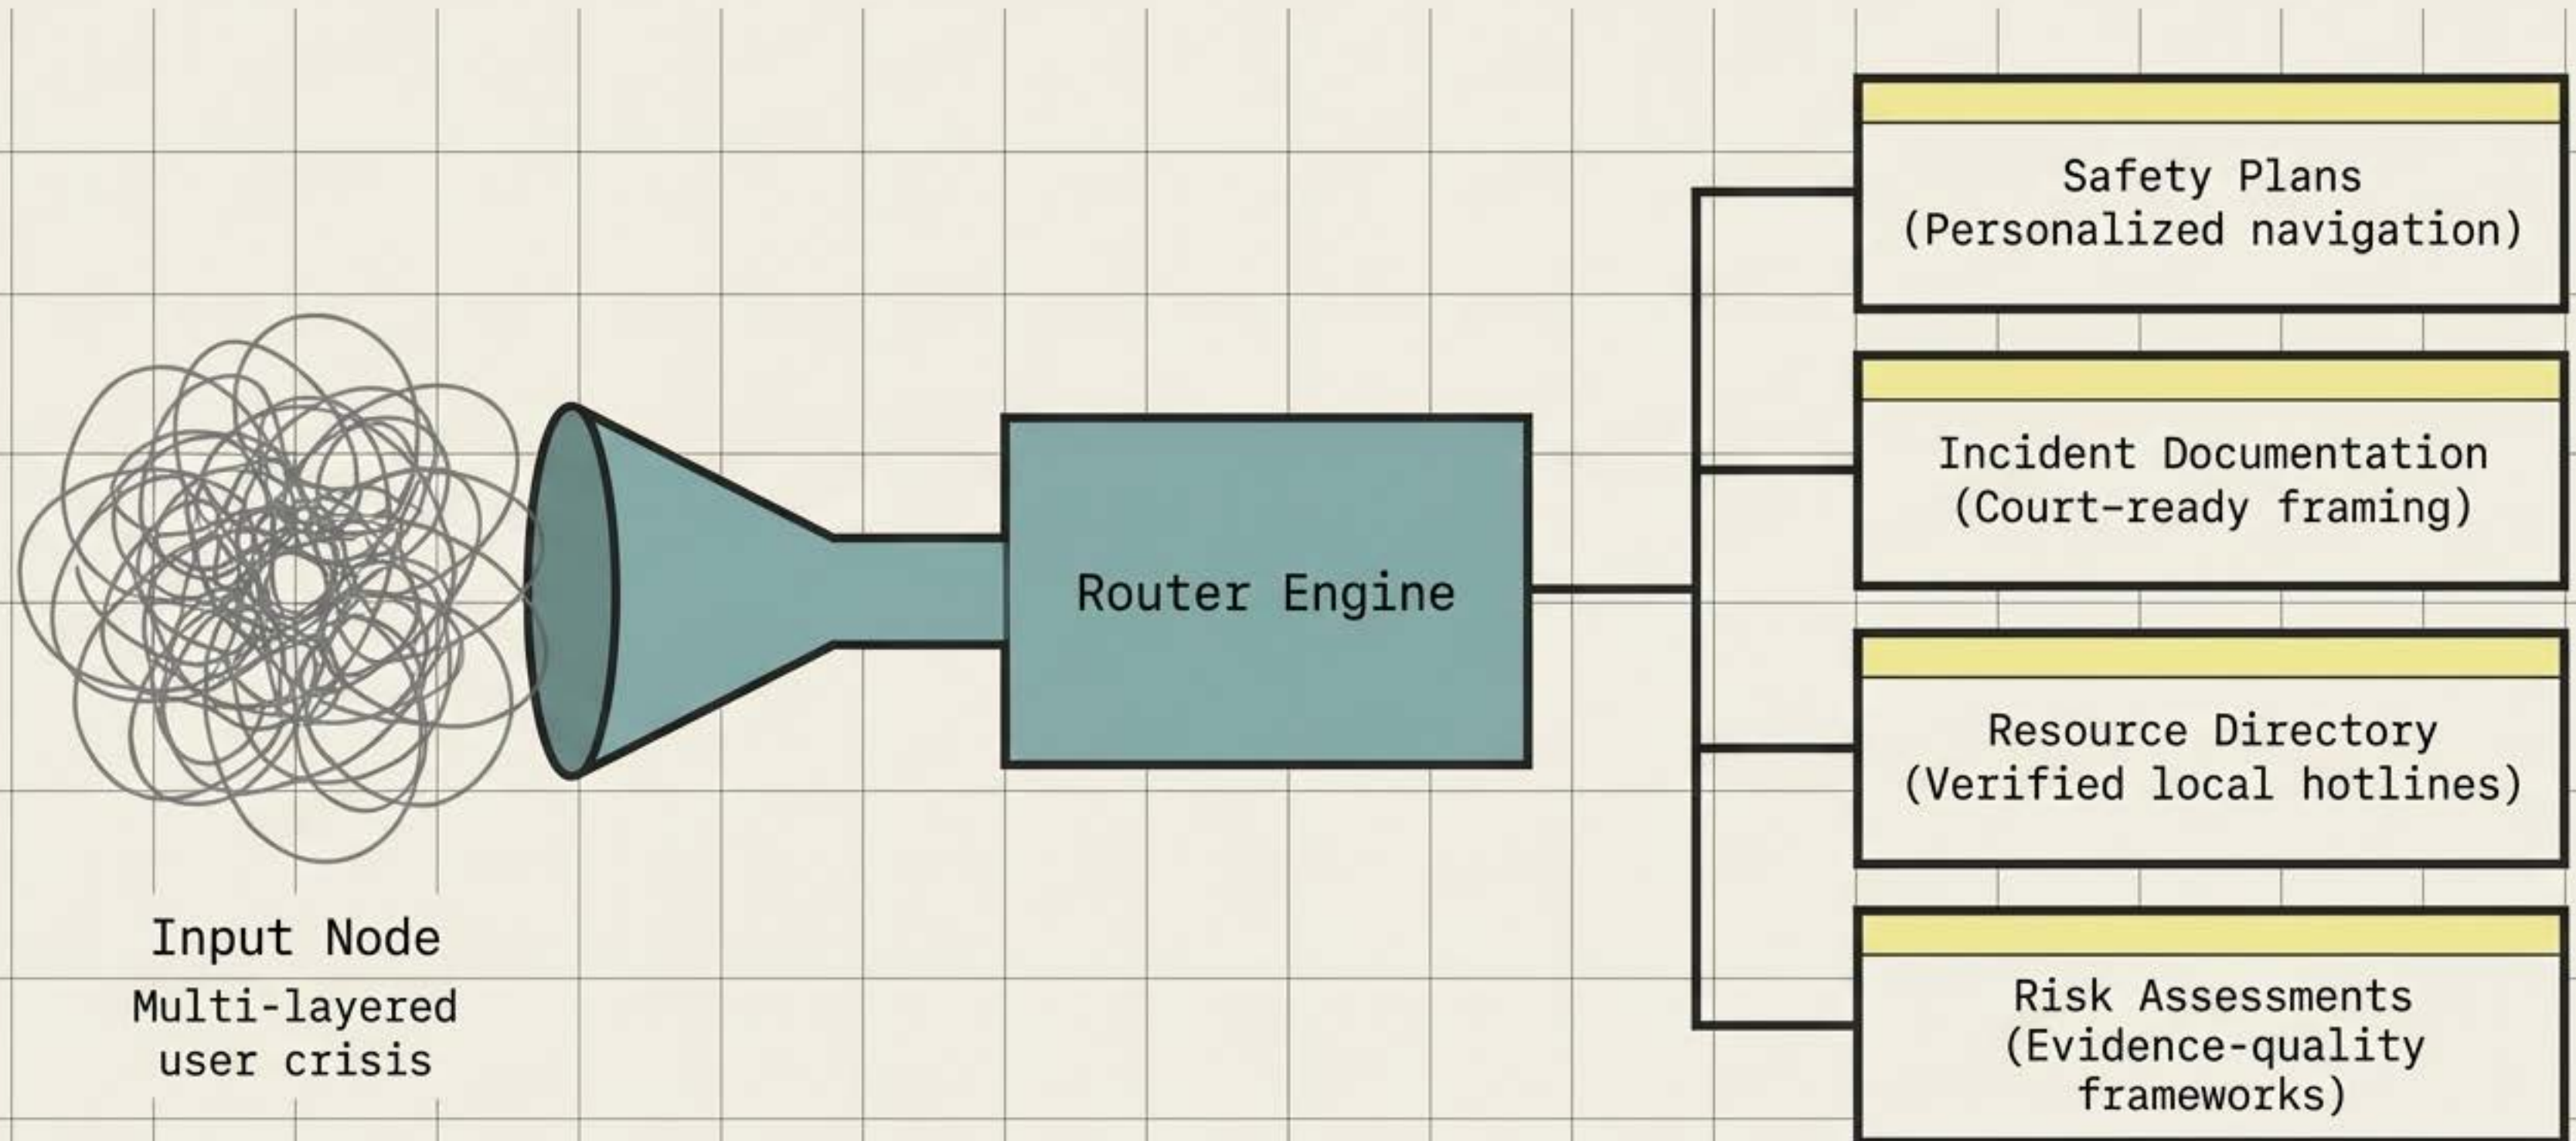

A structured knowledge system, not a conversational chatbot

Transforming complex crisis narratives into structured artifacts

The engine automatically detects the nature of the safety concern and deploys one or more of these specialized structural responses.

Navigating every dimension of community safety

Spanning 100+ highly specialized subtopics.

Crisis Response

911, 988, crisis lines, mobile crisis teams, co-responder models, stabilization.

Violence & Abuse

Domestic violence, child abuse/neglect, sexual violence, elder abuse, human trafficking, stalking.

Community Safety

Gun violence, community violence intervention (CVI), hate crimes, school safety, active threats.

Legal Protection

Protective orders, victim rights, crime victim compensation, VOCA, mandatory reporting.

Behavioral Health

988 system, psychiatric holds, suicide prevention, overdose response, naloxone, MAT.

Environmental

Disaster preparedness, housing safety, lead/mold/code violations, workplace safety.

Digital & Tech

Cyberstalking, spyware, AirTag tracking, doxxing, NCII/revenge porn, sextortion, CSAM.

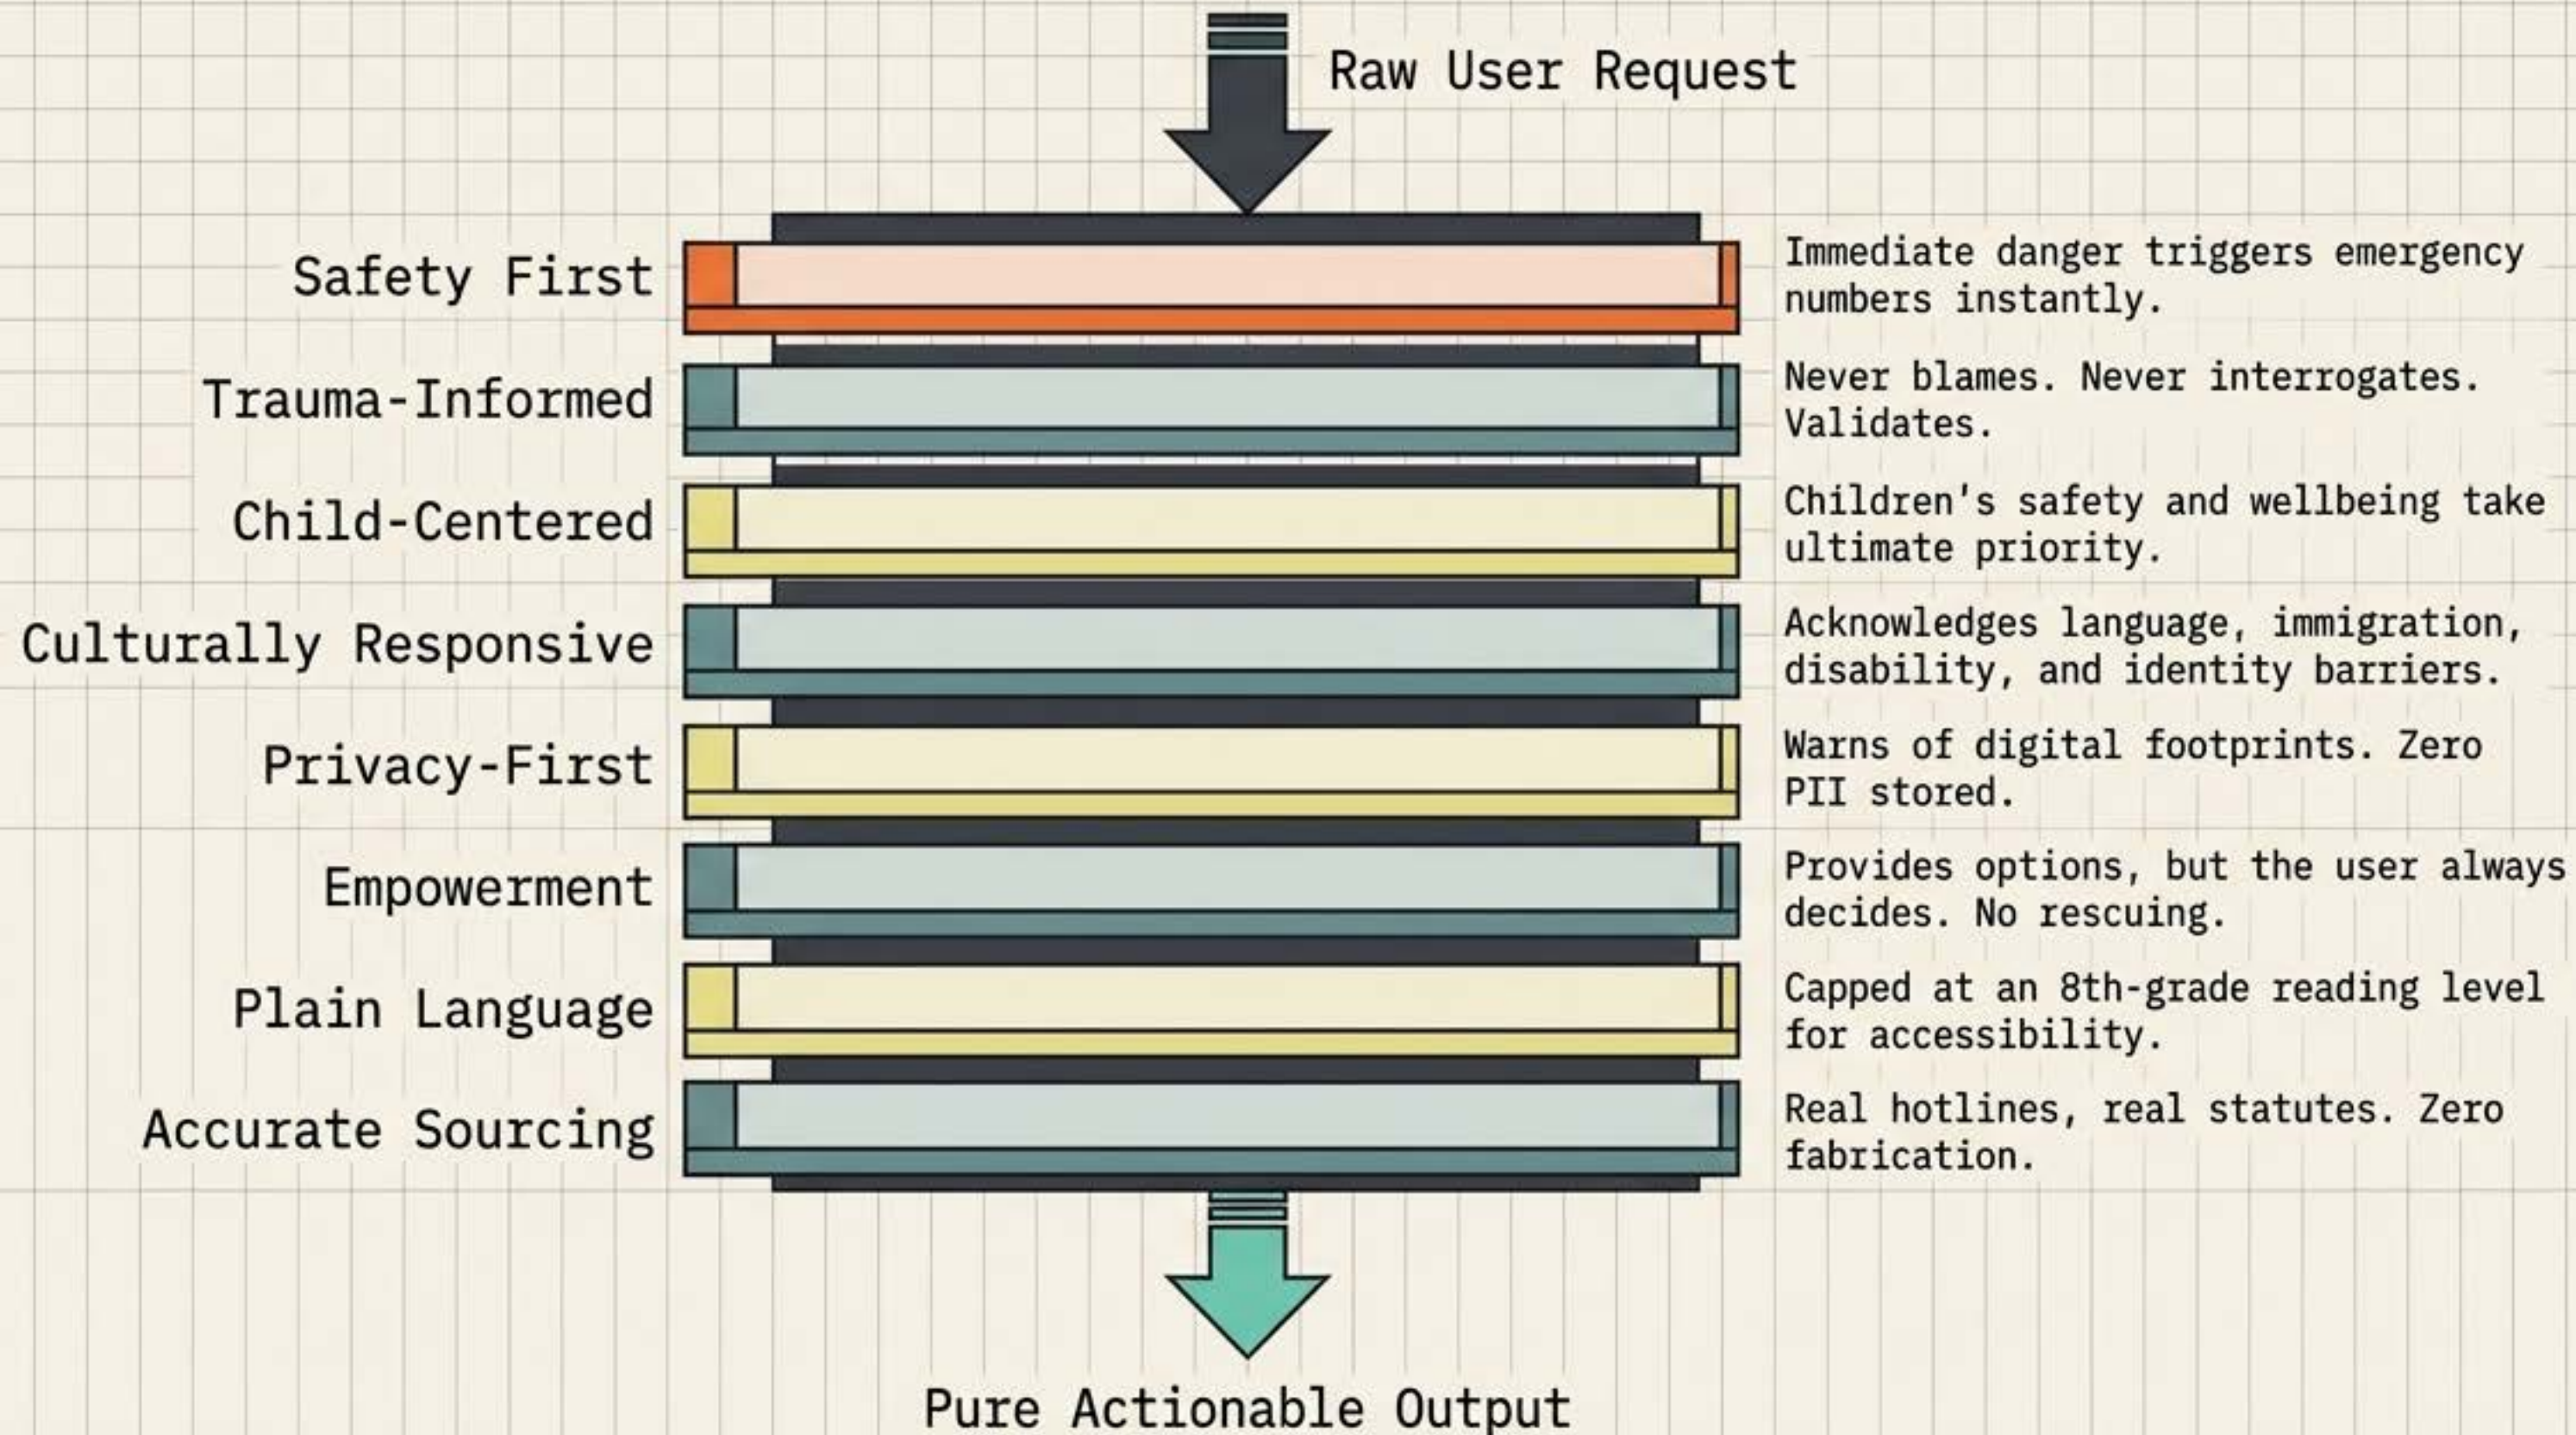

Vulnerable Pops

LGBTQ+, disability, immigration (U/T-visa), refugee, veteran, unhoused, youth aging out, tribal.

Universal tools underpinning the domain infrastructure

The ethical filters shaping every system output

Hard boundaries and operational guardrails

Not Legal Advice.

This provides educational safety information, not representation.

Not a Clinical Tool.

The assessment is an information-gathering framework, not a validated diagnostic instrument.

Not a 911 Substitute.

Immediate danger requires a direct 911 call.

Resources Change.

Phone numbers, addresses, and services require regular regional verification.

Laws Vary.

Base statutes are Missouri-specific. The system must be forked and updated for local jurisdictions.

Two pathways to immediate deployment

Track A: Use as a Claude Skill (Fast)

- 
- Step 1:** Download the repository.
 - Step 2:** Add access-to-safety/ folder to Claude skill directory.
 - Step 3:** Claude automatically assumes routing duties.

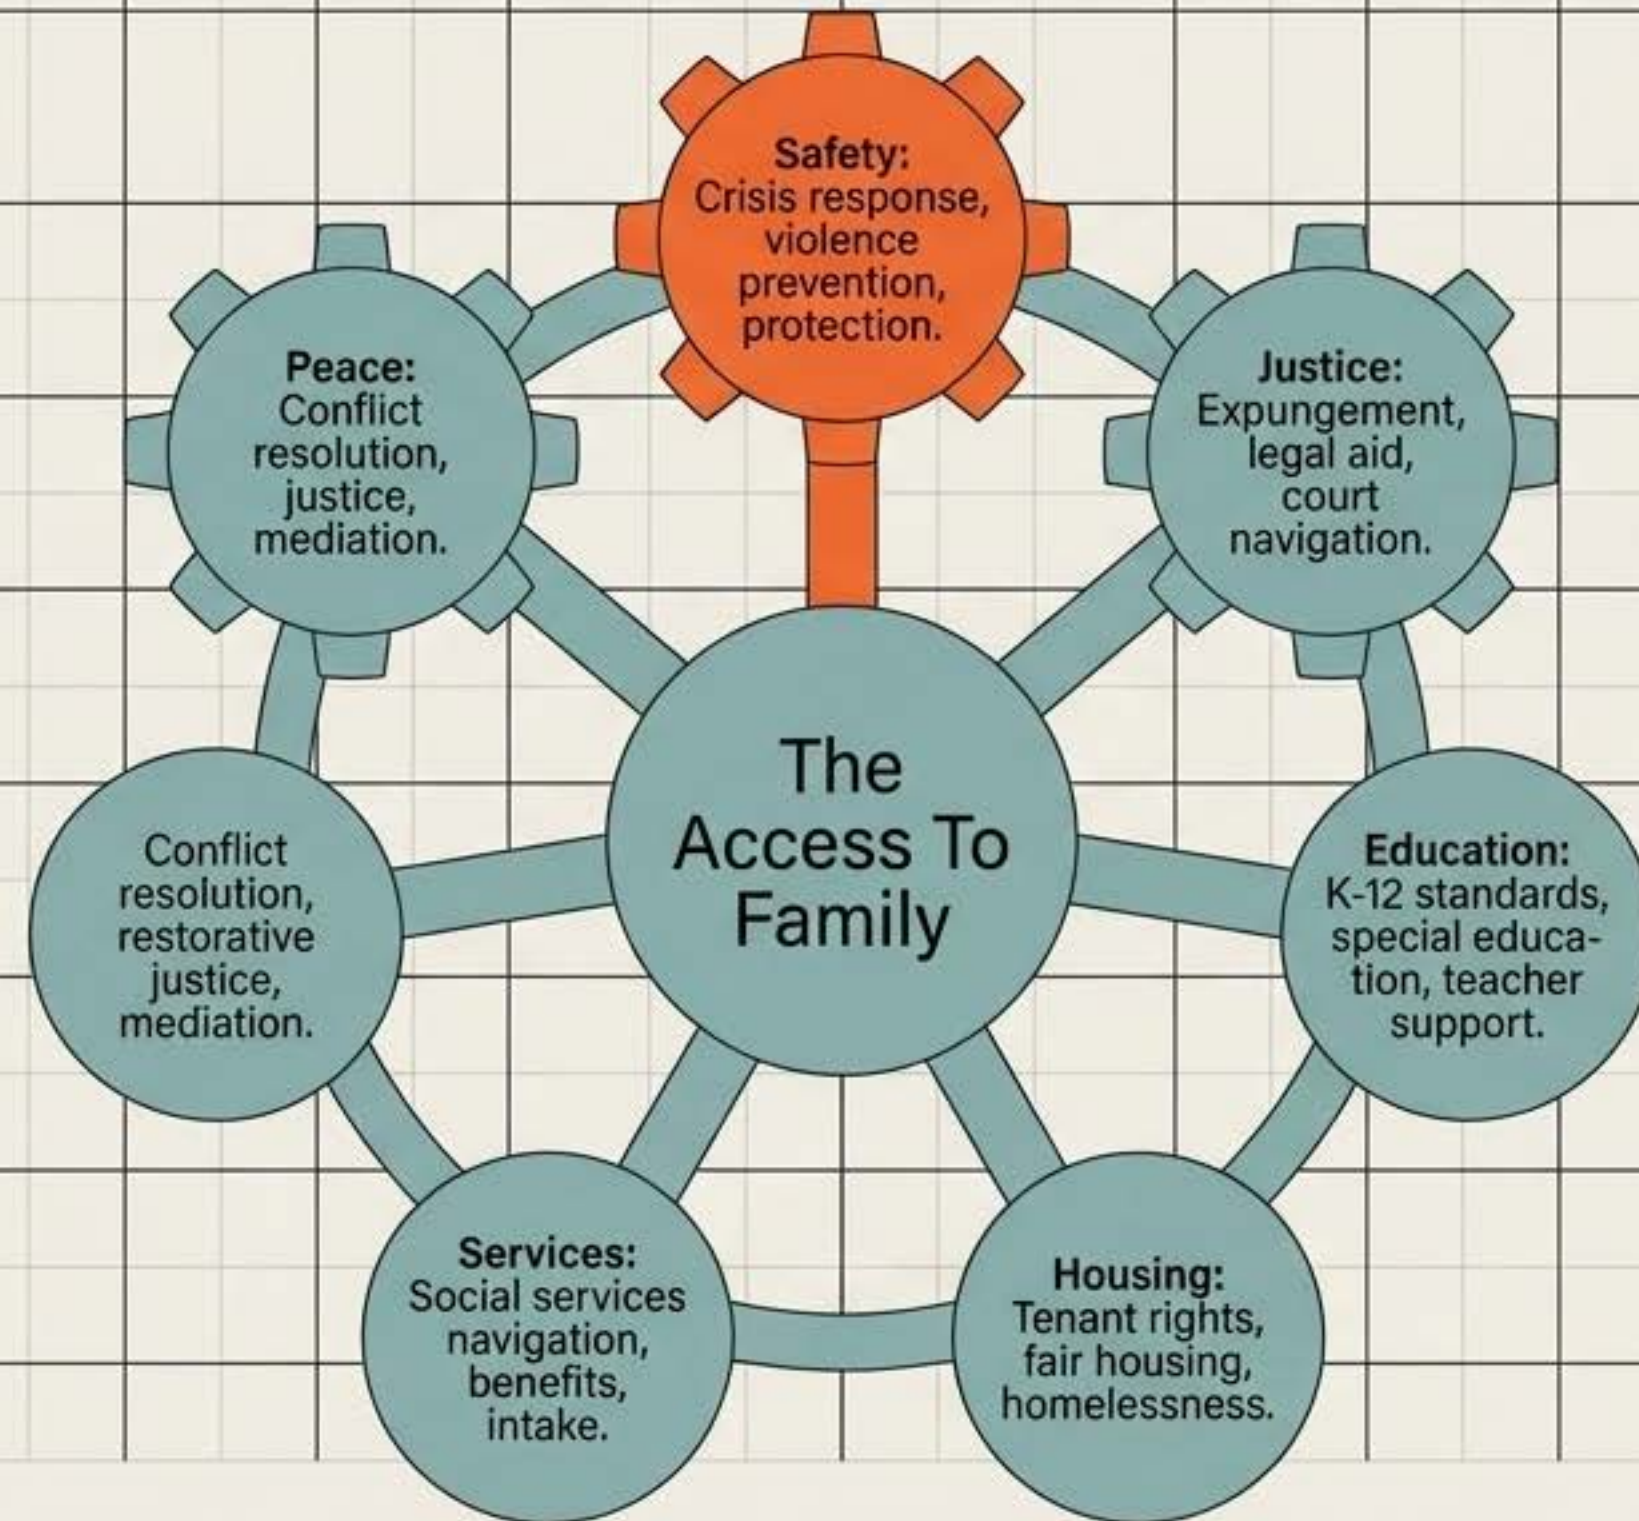

Track B: Fork for Your Region (Deep)

- 
- Step 1:** Fork the repository.
 - Step 2:** Read templates/customization-guide.md.
 - Step 3:** Swap St. Louis County data for local resources in pod files.
 - Step 4:** Validate all local phone numbers and addresses.
 - Step 5:** Submit a PR to share your region's infrastructure.

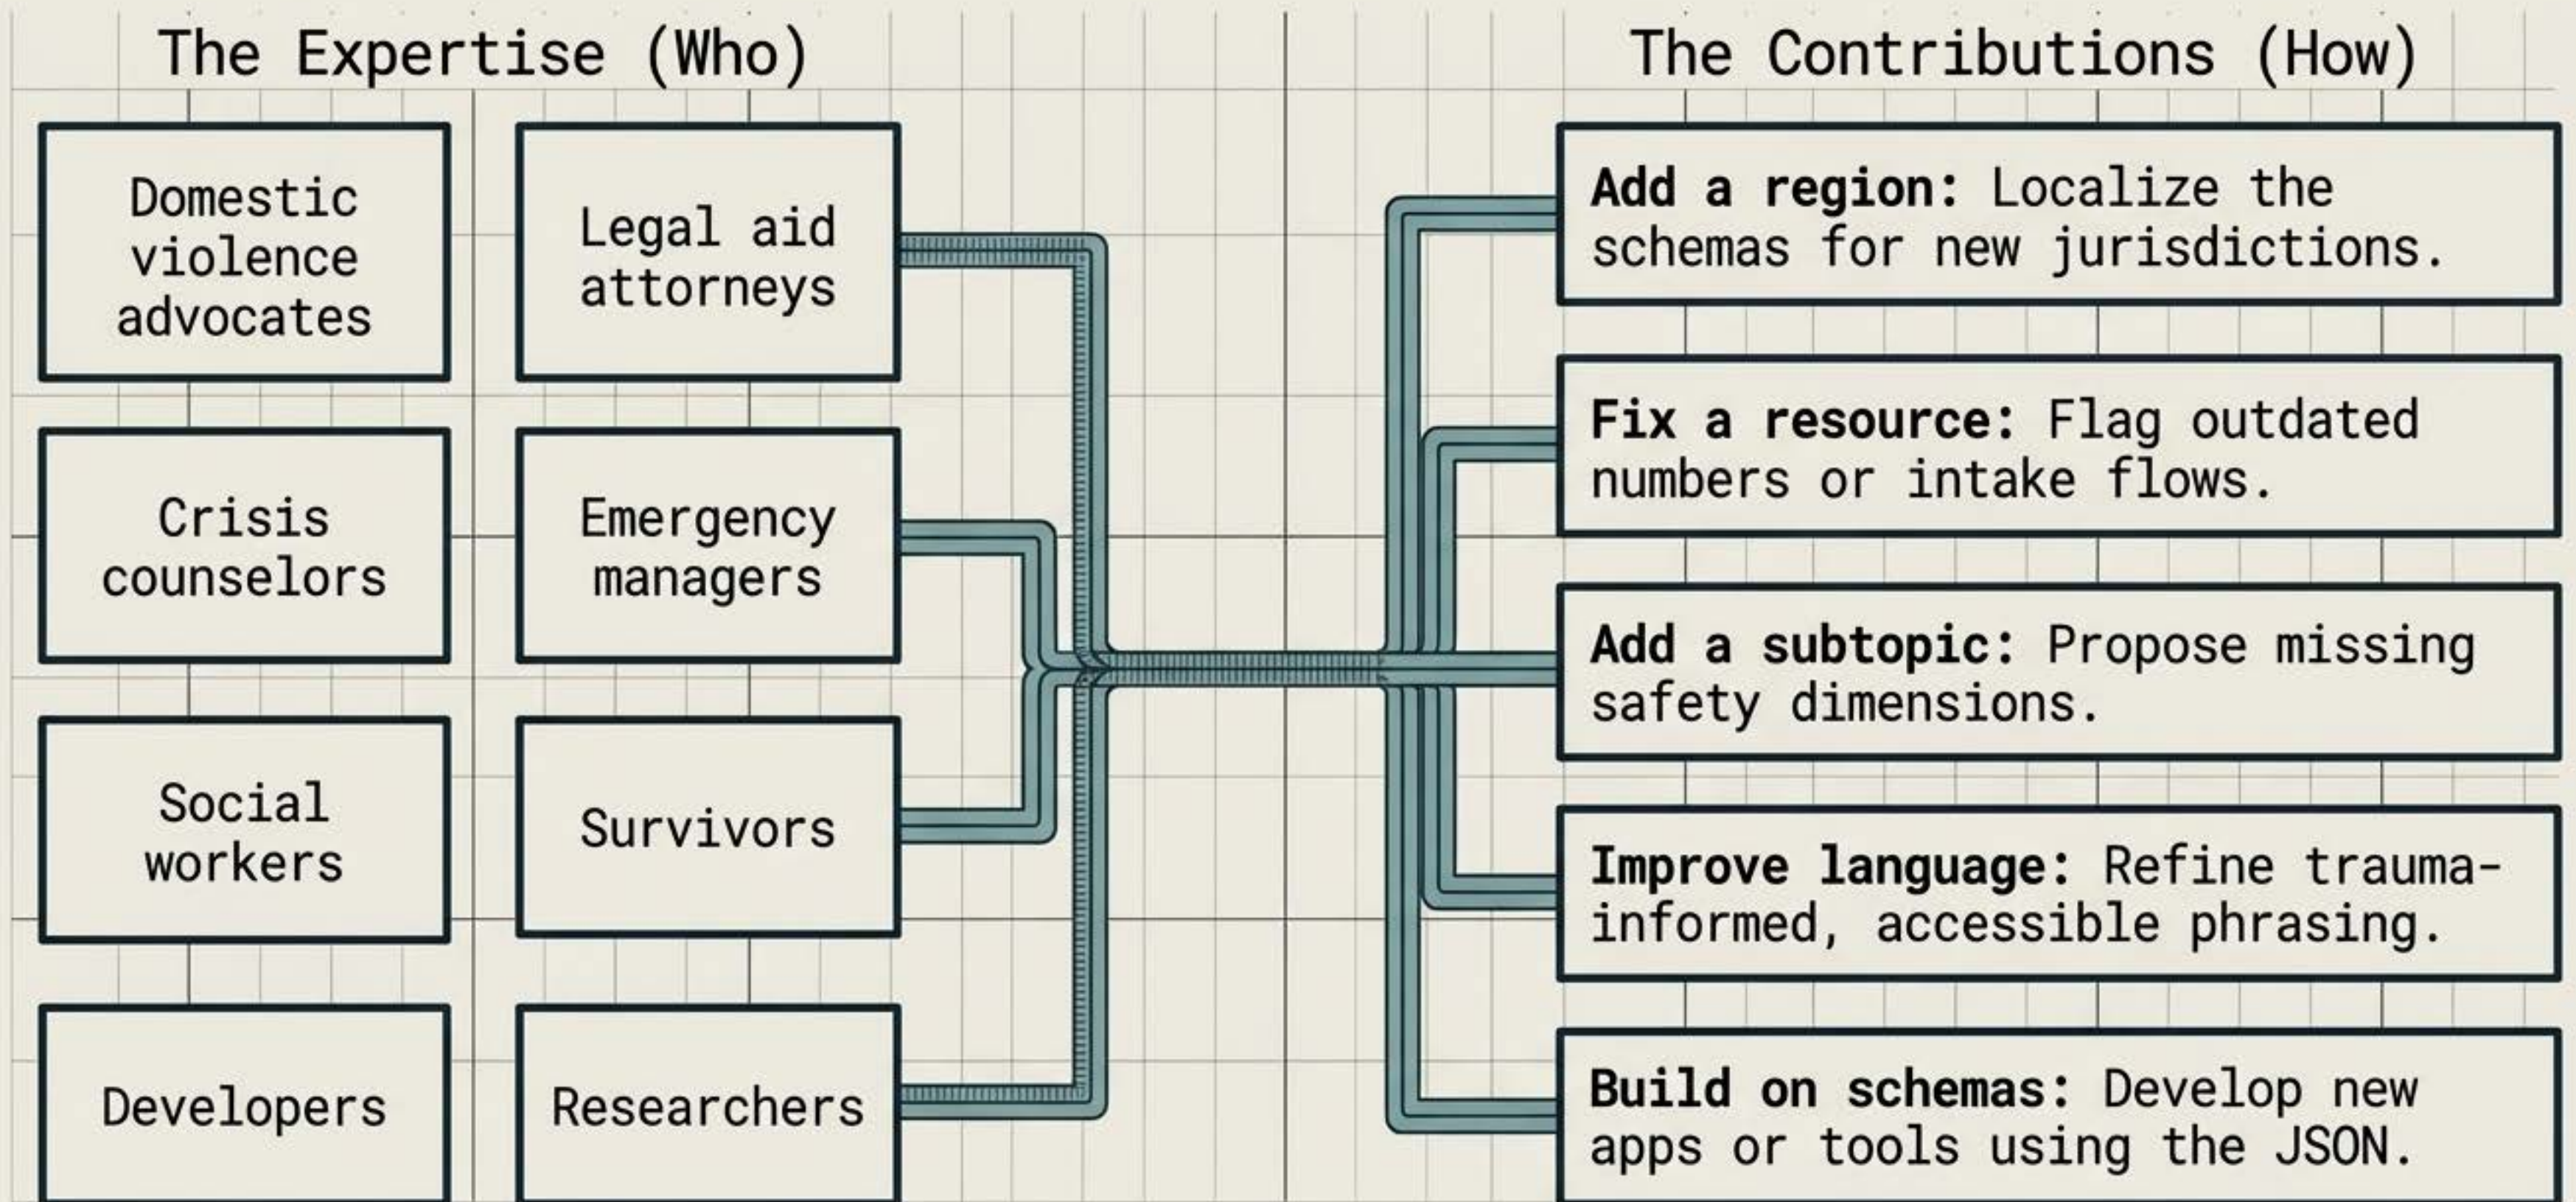

Distributed freely under the MIT License.

An open-source operating system for foundational human rights

Safety is just one module in a replicable, open-source infrastructure designed to scale human rights access globally.

The interlocking expertise powering the ecosystem

The Ultimate Safety Net

Built with care by the CoTrackPro community. Because everyone deserves to know how to be safe.
